Put together your mixture

Your application will guide you to our product

We are always there to answer any questions you may have

Benefit from the accessory recommendations of our experts

The screenshot shows the user interface of the Mixture Guide. At the top, there is a navigation bar with 'Activity' and 'Ongoing quotation' buttons. Below this is a progress indicator with three steps: '1 Choose your activity', '2 Refine your choice', and '3 Find your product'. The main content area is titled 'What is your analytical application?' and features a grid of ten application categories, each with an icon and text: Automotive Engine Emission Testing, Industrial Emission Monitoring, Natural Gas Analysis, Safety Detection 'Ex-Ox-Tox', Burner Testing, Feed / Purge / Zero Gas, Cell Culture, Isotopically Characterized Gases, Define my own mixture, and Our standard mixtures. On the right side, there is a 'Need help? Contact our experts' box with options for Email, Phone, and FAQ.

**The eMixture Guide will lead you in just a few clicks through an entire process of selecting or composing a gas mixture:**

- More than 400 standard products available in various cylinder sizes sorted by application,
- Simple process to compose custom mixtures,
- Provides the Air Liquide support team with complete information,
- Quotation within a few working days.

# Frequently asked questions and Answers

## What information can I find in the Air Liquide Mixture Guide?

Whether you are dealing with emissions tests, the operation of analysis equipment or cell culture atmospheres – the Mixture Guide will lead you to the right mixture for many different applications. In addition, gas mixtures can be put together on their own, and standard products from Air Liquide can be viewed.

## How do I get the Mixture Guide from Air Liquide?

The Mixture Guide is designed as a website that you can access without logging in, at any time and from all your devices. Whether you are in the office on your desktop PC or in the laboratory with a tablet, the Mixture Guide is optimized for all devices. Simply go to [mixtureguide.airliquide-benelux.com](https://mixtureguide.airliquide-benelux.com) and click away.

## I'm now at the [mixtureguide.airliquide-benelux.com](https://mixtureguide.airliquide-benelux.com) – what's my next step?

The website will guide you through step by step. First, you merely need to select your application and further refine your choice as required, for example by setting the substances to be analysed or the analyser to be used. Done – that's all you need to do. For the selected mixture you can then directly request a quote.

## Which products will I find in the Mixture Guide?

The Mixture Guide includes both standard products and self-configurable individual gas mixtures. It will immediately check whether your individual requirement already exists as an Air Liquide product and will then propose this, or similar mixtures as an alternative. If not, you will receive an offer for the desired gas mixture as a special order.

## For which users is the Mixture Guide suitable?

The Mixture Guide is intended as a support for the entire application range of specialty gases. Particularly interesting is the offer for users in the areas of research and analysis. The Mixture Guide covers a wide range of requirements with just a few clicks: From the recommended pressure reducer for gas beginners to individual configuration of mixtures for experienced users.

## I have requested a quote – how long will it take to receive it?

We deliver the right offer for your inquiries within two working days. Then you can order directly.

## Can I still contact someone personally?

The Mixture Guide provides you with a wealth of information. Air Liquide remains at your disposal should you have any further questions. In this case, please contact us by phone or via [Expertisecenter.North-West@airliquide.com](mailto:Expertisecenter.North-West@airliquide.com).
